Summary

I love developing web sites that are beautiful, but also fluid, responsive, and easy to use. I focus on UX/UI design with an extensive knowledge of HTML/CSS/JS, React, Svelte, SEO, and logo design. I have a background in Graphic Design and building out design systems with the Atomic Design methodology. I thrive in the front of the frontend and stitching together the Jamstack. I have recently been working with Next.JS and SvelteKit.

Work experience

Online Instructor

Auth0

Learner's Path YouTube series for Auth0 teaching **Svelte** and **Svelte-Kit** file-based routing, API routes, dynamic routes, global and scoped CSS.

ZTM Academy

Lead a ZTM Academy exclusive **Responsive Web Design** workshop focused on teaching you how to deliver a fluid, consistent design using modern CSS tools and responsive web design best practices.

Freelance

CodingCat.dev

Built a **design system** and **style guide** from scratch and implemented into a **Next.JS** frontend with **TailwindCSS**.

 codingcat.dev

Learn Build Teach

Created a new **logo design**, community meetup **templates**, and **emojis** for the **Learn Build Teach** discord community by **James Q. Quick**.

Technology

- SvelteKit
- NextJS
- TailwindCSS
- API's
- Markdown
- HTML/CSS/JS

Projects

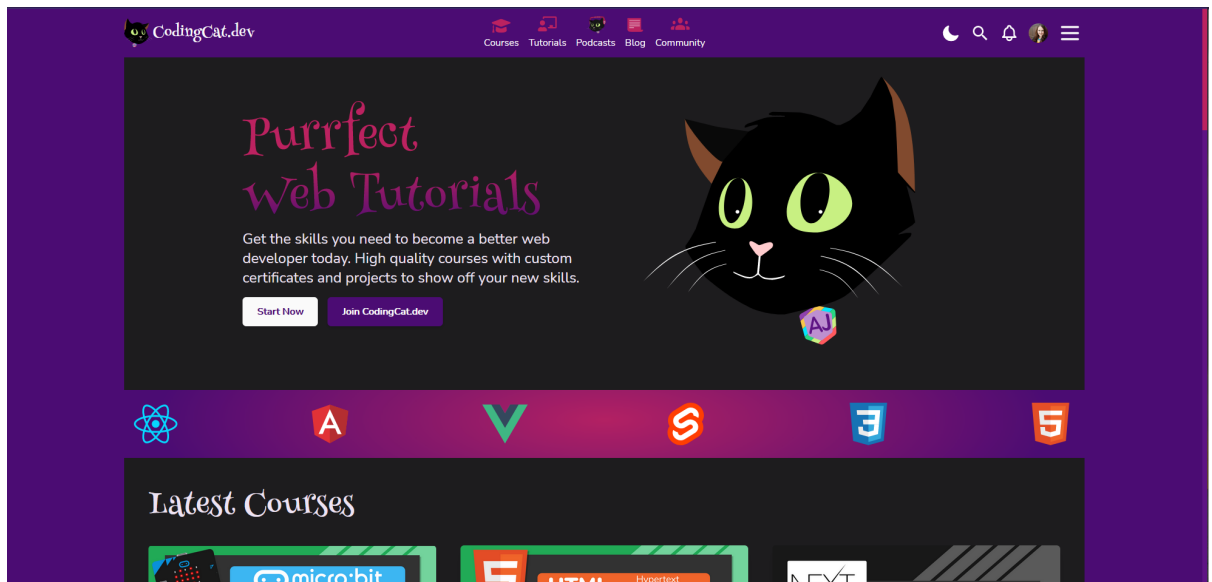

- **Coding Cat Dev** - *NextJS, TailwindCSS, Firebase*

Built a **design system** and **style guide** from scratch and implemented into a **Next.JS** frontend with **TailwindCSS**.

Accomplishments

-  Created a design system and style guide in Figma.
-  Used TailwindCSS to use design system in frontend.
-  Used React with NextJS to integrate API's like Cloudinary and Firebase.

- Brent DeYoung Builders - *NextJS, TailwindCSS, Sanity*

Created a new design from scratch and implemented the frontend into a Next.JS, TailwindCSS, and Sanity stack.

Accomplishments

-  Created a design in Figma.
-  Used TailwindCSS to use design system in frontend.
-  Used React with NextJS to integrate with SanityCMS.

- **The Console Logs** - *Svelte, Sapper, Markdown*

In this project, I built a blog site using Svelte and Sapper to keep all of my notes as I was learning development. I am in the process of converting this site to SvelteKit.

🏆 Accomplishments

- ✎ Added PrismaJS to colorize code blocks.
- ✎ Used remark to pull in Markdown pages and parse them to Sapper.
- ✎ Notes on over 10 different tech languages in Markdown.

- Volunteer Check In System for Elementary School - *Svelte, Sapper, Google Sheets*

In this project, I used Svelte and Sapper to build a check-in system for volunteers at my children's elementary school. This app allows volunteers to check in and out when they are at the school and posts the data to a Google Sheet spreadsheet for tracking.

🏆 Accomplishments

- ✎ Built a search box pulling in data from a json file.
- ✎ Connected to Google Sheets for easy tracking of volunteer hours.

✎ Dealt with time tracking and dates with Svelte and JavaScript.

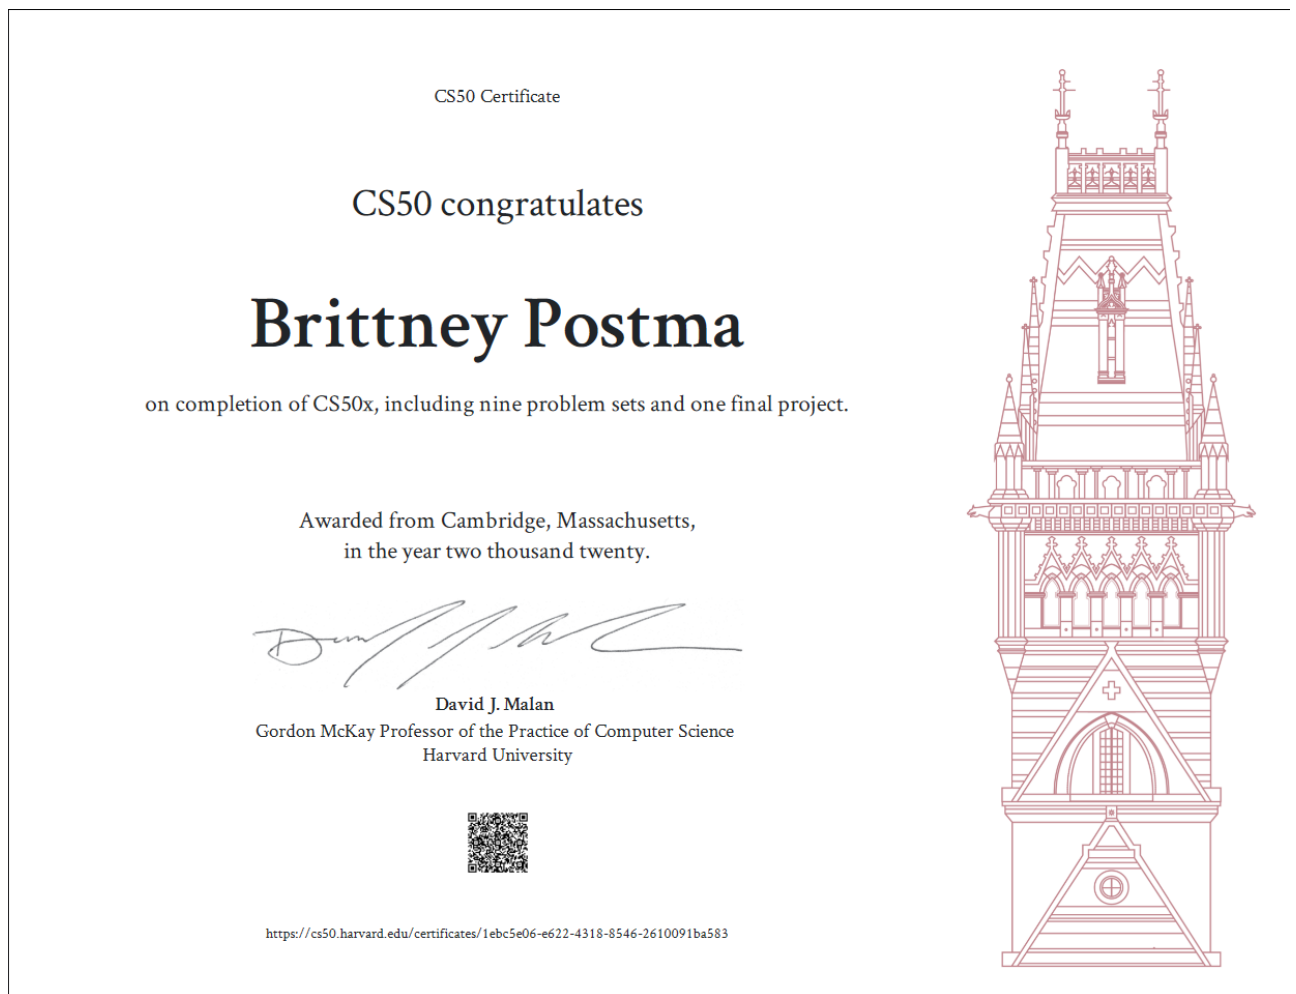

Due to the sensitive nature of the information, I cannot display this site.
